

Improve Your Heat Transfer Efficiency With MultiTherm IG-1[®] Heat Transfer Fluid

A New Economical Heat Transfer Fluid for the Liquid Terminal Market...

MultiTherm IG-1[®] is a highly refined hydrotreated mineral oil designed for the Liquid Terminal Market. It is an odorless, non-corrosive, and non-benzene base fluid that can offer long service life and excellent performance in closed-loop systems. MultiTherm IG-1 offers higher thermal conductivity than other fluids, which can allow for more efficient operation and lower energy costs.

MultiTherm IG-1[®] Benefits:

- Operates up to 550°F
- Non-Toxic
- Non-Hazardous
- Superior Safety Properties including higher flash point
- Compatible with other *leading* heat transfer fluids on the market

*Another innovative product
from the world leader in Heat Transfer Fluids.*
