

Improve Your Heat Transfer Efficiency With MultiTherm FF-1[®] Flushing Fluid

Whether it's startup or general maintenance...

MultiTherm FF-1[®] offers an economical way to help lower the operating cost of your heat transfer fluid system. General maintenance – helps loosen and remove sludge, scale, particulate matter and used heat transfer fluid from existing, fouled systems prior to recharge or fluid changeover. New systems – helps remove weld splatter, fines, and particulate matter left in lines and equipment, as well as some oils and preservative finishes.

MultiTherm FF-1[®] Benefits:

- Operates up to 600°F
- Compatible with all mineral oil based heat transfer fluids
- Non-Toxic and Non-Hazardous
- Very low vapor pressure

*Another innovative product
from the world leader in Heat Transfer Fluids.*
